Supports cellular health and immune function

Description

Quercetin is a dietary flavonoid that supports the healthy function of cells and is found in red grape skins, red onions, apples, buckwheat, among others. Studies have shown that it can help to reduce inflammation and supports immune response during seasonal changes.

This compound demonstrated the capability to support a healthy cardiovascular system, by protecting the integrity of your vascular endothelium, and healthy blood pressure levels, already within a normal range. This phytonutrient can also support healthy cholesterol levels and healthy blood glucose levels.

Quercetin can encourage a healthy immune response by inhibiting inflammatory factors and supporting whole-body healthy, particularly during seasonal changes. Optimized Quercetin also integrates vitamin C and camu-camu berry extract to offer further immune function support.

Optimized Quercetin is a proprietary formulation that sets the "gold standard" for high-quality quercetin derived from a food-source blend.

Dosage and use:

Take one (1) capsule once or twice daily.

Warnings:

KEEP OUT OF REACH OF CHILDREN.

DO NOT EXCEED RECOMMENDED DOSE.

When using nutritional supplements, please consult with your physician if you are undergoing treatment for a medical condition or if you are pregnant or lactating.

A food supplement should not be used as a substitute for a varied and balanced diet and a healthy lifestyle.

Store tightly closed in a cool, dry place.
